

Dear Parents/Guardians,

As part of our new science series, each student will receive a hard cover student text for each unit of study and an electronic version of the text on CD as well. These CDs also contain numerous activities for review and enrichment.

Each book and CD is numbered and your child will typically receive a matching set. For example, if the textbook is labeled number ten, then it is likely that the CD distributed to your child will be labeled the same. The cost for a lost or damaged book is \$18.09 and the cost for a lost or damaged CD is \$71.94. Since the replacement costs for loss or damage of the CDs are higher than the single unit module texts, it is suggested that each student uploads the disks to a home computer and return the original right away. Students do have the option, however, to turn in their assigned CDs with texts when they are collected, or choose not to take the electronic text versions and simply go to classzone.com for review and enrichment activities.

Please sign and date below acknowledging your understanding.

Sincerely,

John R. Jones Jr.
