Section: \_\_\_\_\_

# Find someone who...

can tell you the difference between potential and kinetic energy.

---

---

---

---

---

---

---

can describe an energy conversion and provide an example of one form of energy converting into another.

---

---

---

---

---

can tell you about the connection between friction and thermal energy.

can explain the law of conservation of energy.

---

---

---

---

---

---

---

can explain what makes one thing more energy efficient than another thing.

can list and describe the six forms of energy.

- 1.
- 2.
- 3.
- 4.
- 5.
- 6.

can tell you how energy and work are related.

---

---

---

---

---

Students must initial the answer they give you after you write it down.
