

# Astro-Venture

<http://astroventure.arc.nasa.gov/>

**Directions:** Working in groups (3 - 4 students), go to the above internet site. Once at the site, click on the "Astronomy Training" link and proceed through the training session. Upon the successful completion of the Astronomy Training, the group should complete the remaining three training sessions (Atmospheric Science, Geology, and Biology). After each training session has been completed and the group has acquired a well-rounded base of information related to the habitability of a planet, click on the "Design a Planet" link. Now is the group's chance to apply what they have learned in order to design a planet suitable for human life. Simply follow the directions and create. **GOOD LUCK!**
