Chemical Bonds - Analogies

Directions - Since we have been discussing the three types of chemical bonds, I have tried to provide you with analogies to help you remember what characterizes each type of bond. For this activity, you should provide a definition of the listed bond, a visual of how the atoms interact to create the bond, and you should create your own analogy to help you remember the bond.

Type of Bond	Definition	Visual	Analogy
Ionic Bond			

Type of Bond	Definition	Visual	Analogy
Covalent Bond			
Metallic Bond
