Self Assessment - Solutions

Directions: Consider each of the following objectives and use the rating scale below to rate yourself based on how well you think you understand or can explain the objective.

Objective	Pre-Lesson Rating	Post-Lesson Rating
1. Describe a mixture and the two main types (heterogeneous and homogenous).		
2. Identify the parts of a solution (solute & solvent).		
3. Explain how the properties of a solution differ from their separate component		
4. Explain the importance of concentration as it pertains to a solution		
5. Compare and contrast the different factors that influence solubility (temperature, pressure, molecular structure).		
6. Describe acids and bases.		
7. Explain how a pH scale works.
