## Writing Procedures

In a laboratory experiment the procedure section provides the detailed instructions for how to conduct the experiment. The procedures are actually a lot like a recipe in that they list the steps for how to create/do something using specific materials. For this assignment you are going to practice writing procedures in a clear and concise manner. This will require you to imagine that the individuals you are writing the procedures for have no prior knowledge or understanding related to the task. Your procedures should:

- describe how to use any listed materials
- be numbered
- be in complete sentences.

**TASK 1** - List the necessary materials and write the procedures for successfully washing one's hands.

Materials:

Procedures:

Have a classmate review your procedures for clarity and conciseness.

Reviewer Feedback:

**TASK 2** - List the necessary materials and write the procedures for successfully completing a task of your choice.

Chosen Task - \_\_\_\_\_
